

Wireless Doorbell Button

Overview

The Axiom Wireless Doorbell Button is beautifully designed to welcome guests at your door. A press of the button wirelessly activates our chime relay or other configured devices.

Installation is simple. With a long lasting lithium battery there is no wiring necessary and its surface mount design means you have a choice between using two screws or the peel and stick adhesive strips.

Since the Axiom Doorbell Button communicates with the controller, doorbell rings can be turned off for pre-programmed events such as "baby asleep." Fully compatible with Control4.

Two external contacts enable detection of whether the door is closed and whether the deadbolt is engaged.

Model Number

DB-C4ZB-11

Approvals

FCC Part 15

CE

Wireless

ZigBee PRO (802.15.4)

Control4 driver downloadable

Color

White or Black

Dimensions

W 1.1875" x H 2.75" x D 0.5"
